Target version:	
Description Showing files in a collection takes an awful lot of time for large collections. For qr1hi-4zz18-tcnxylwkxg0nfhi , it is observed that it took 15 seconds or more. https://arvados.org/projects/arvados/wiki/Collection_API_-_Performance_enhancements#2-Collectionshow-in-workbench-2 Suggested solution: Add infinite scrolling to show_files, rather than "displaying" ALL the files in the collections in one stretch. Also, #6049 is likely to impact how this issue is resolved. Ideally, 6049 should be resolved before this issue.
