

Arvados - Bug #6835

[Workbench] Make it possible to share project with other users I can't see

07/30/2015 10:14 PM - Nancy Ouyang

Status: Duplicate	Start date: 07/30/2015
Priority: Normal	Due date:
Assigned To:	% Done: 0%
Category: Workbench	Estimated time: 0.00 hour
Target version:	
Description I would like to share a project containing private data with another person. Potential solutions? 1) Private sharing link (no account creation needed) -- I don't think this exists yet? 2) Account creation needed IN the latter case, if I am not admin on su92l, under the "share with users" tab, I can only share with myself! Not helpful. Ideally, if I enter in a gmail account email address, it should send an invite to that person. Or perhaps, given some sort of user uuid (that does not try to match), I can add that specific person.	
Related issues: Is duplicate of Arvados - Feature #5297: [Workbench] Enable users to share wi... New 02/23/2015	

History

#1 - 08/11/2015 03:16 PM - Brett Smith

- Subject changed from Share project with another person, not as admin on su92l to [Workbench] Make it possible to share project with other users I can't see
- Category set to Workbench
- Status changed from New to Duplicate
- Target version deleted (Bug Triage)

Closing as duplicate of [#5297](#).
