Arvados - Bug #6846

[Workbench] Top nav login link loses user's place in Workbench

07/31/2015 07:45 PM - Nancy Ouyang

Status:	Resolved		**Start date:**	11/09/2015
Priority:	Normal		**Due date:**	
Assigned To:	Brett Smith		**% Done:**	100%
Category:	Workbench		**Estimated time:**	0.00 hour
Target version:	2015-12-02 sprint			

Description

If I'm not logged in and open a link to a project I can access, I get access denied. However, after I log-in, I get redirected to the homepage, instead of back to the project, which is slightly annoying.

Subtasks:

Task # 7739: Review 6846-workbench-top-nav-login-returns-wip	**Resolved**

Associated revisions

Revision 8d9db886 - 11/12/2015 09:12 PM - Brett Smith

Merge branch '6846-workbench-top-nav-login-returns-wip'

Closes #6846, #7739.

Revision 99ce6a94 - 11/18/2015 04:36 PM - Brett Smith

6846: Streamline Workbench 404 page.

- Prompt the user to log in with a prominent button.
- Make the page text less verbose.
- DRY up the code in the _report_error partial.

Refs #6846.

History

#1 - 08/02/2015 03:42 PM - Radhika Chippada

Nancy, please confirm:

Clicking the log in link within in the body of the Page not found error page (I notice you are not logged in. If you're looking for a private page, you'll need to log in first), does take me to the page that brought me to the error page.

However, clicking on the Log in link in the top navigation bar takes me to home page.

#2 - 08/06/2015 05:43 PM - Nancy Ouyang

If I got to
https://workbench.su92l.arvadosapi.com/projects/su92l-j7d0g-swtofxa2rct8495
I get

```
Not Found
The group with UUID su92l-j7d0g-swtofxa2rct8495 was not found.
```

Then I click "log in" on the top nav bar, and it goes to the homepage.

The log-in link inside the page itself totally works --

```
(I notice you are not logged in. If you're looking for a private page, you'll need to log in first.)
```

but I didn't notice it until you pointed it out.

So a quickfix would be to make that link bigger or look more like a button?

#3 - 08/06/2015 05:51 PM - Radhika Chippada

Thanks for clarifying Nancy.

I am also wondering if it would be feasible to use the same login link generation logic (as in the text "If you're looking for a private page, you'll need to log in first") for the Login link in the top navigation bar as well. So, it would either point to the page under consideration in a situation like you encountered or points to dashboard when no such scenario exists.

I agree, we should at least do this. No login link or button should forget the user's place in Workbench.

#5 - 08/11/2015 03:20 PM - Brett Smith

- Subject changed from User is redirected to homepage of workbench instead of project after logging in to [Workbench] Top nav login link loses user's place in Workbench

- Category set to Workbench

- Target version changed from Bug Triage to Arvados Future Sprints

- Story points set to 0.5

#6 - 11/09/2015 07:44 PM - Brett Smith

- Status changed from New to In Progress

- Assigned To set to Brett Smith

#7 - 11/09/2015 10:21 PM - Brett Smith

- Target version changed from Arvados Future Sprints to 2015-11-11 sprint

#8 - 11/11/2015 10:45 PM - Brett Smith

- Target version changed from 2015-11-11 sprint to 2015-12-02 sprint

#9 - 11/12/2015 04:38 PM - Radhika Chippada

Clicking on the login link in top nav or the top nav hover dropdown links is resulting in the following error: {"errors":["#<NoMethodError: undefined method `[]' for nil:NilClass>"],"error_token":"1447346070+a90d2159"}

#10 - 11/12/2015 08:30 PM - Brett Smith

Thanks for catching that. Ready for another look at 702ff97.

#11 - 11/12/2015 08:48 PM - Radhika Chippada

Now the login actions from topnav are working and the return URL is also preserved.

LGTM

#12 - 11/12/2015 09:15 PM - Brett Smith

- Status changed from In Progress to Resolved
