

Arvados - Bug #7008

[Workbench] Crashes with Fiddlesticks when trying to view a pipeline instance graph copied from another cluster

08/17/2015 09:39 PM - Brett Smith

Status:	New	Start date:	08/17/2015
Priority:	Normal	Due date:	
Assigned To:		% Done:	0%
Category:	Workbench	Estimated time:	0.00 hour
Target version:	Arvados Future Sprints		
Description			
See #7001 for original bug report and details. This happens because Workbench tries to look up jobs from other clusters, fails and gets nil as a response, but assumes it has a real object.			
When we're rendering this graph, any time we try to look up an object, we should check for nil and draw a stub when we get it. Just render the object in the graph by the provided UUID, without trying to introspect any further.
