Arvados - Bug #7743

[Workbench] Hide file preview buttons when preview isn't possible with current keep-web config

11/09/2015 09:23 PM - Tom Clegg

Status:	New		**Start date:**	05/21/2015
Priority:	Normal		**Due date:**	
Assigned To:			**% Done:**	0%
Category:	Workbench		**Estimated time:**	0.00 hour
Target version:				

Description

See CollectionsController#keep_web_url.

From #5824 note 25:

- If keep_web_download_url is set, disposition=attachment links (i.e., downloads) are routed to the given URL (typically https://download.uuid_prefix.arvadosapi.com/c=%{uuid_or_pdh}). This is expected to match keep-web's -attachment-only-host argument.
- If keep_web_download_url is set and keep_web_url is *not* set, preview is disabled and all preview/download links are routed to keep_web_download_url.
- If both are set, but keep_web_url isn't a wildcard (one-vhost-per-collection) form and trust_all_content isn't true, showing inline content from a non-public non-shareable-link collection will result in a download instead of preview.
- If keep_web_download_url is not set, and keep_web_url isn't a wildcard form, and trust_all_content isn't set, showing inline content from a non-public non-shareable-link collection will produce an error: with that configuration, we can't authenticate safely without creating XSS problems.

Don't render file preview buttons in cases 2-4.
