

Tapestry - Feature #8689

Trigger an arvdos job to retrieve the data and import it into Keep

03/15/2016 12:28 AM - Ward Vandewege

Status:	In Progress	Start date:	03/14/2016
Priority:	Normal	Due date:	
Assigned To:	Tom Clegg	% Done:	88%
Category:	Third party integration	Estimated time:	0.00 hour
Target version:	Interpretation automation		
Description			
When the API call described in #8688 is received, that should trigger			
<ul style="list-style-type: none">• an email to the participant saying the transfer has been requested/started• a user log entry to that effect• an Arvdos job that will ingest the data (when that is done, Tapestry needs to get notified or notice; see #8697)			
Subtasks:			
Task # 8794: Notify user that transfer has been initiated			New
Task # 8948: Make arvdos SDK work in ruby 1.8.7			Resolved
Task # 8927: Run job in huXXXXXX project, create & share one if necessary			Resolved
Task # 8793: Generate user log entry			Resolved
Task # 8960: Review 8689-use-downloaded-filename			Resolved
Task # 8949: Review 8697-ruby187-compatible commit:arvdos fd696fa			Resolved
Task # 8950: Review 8689-participant-project at commit:492d441			Resolved
Task # 8902: Use actual filename in "add user_file" callback instead of FIXME			Resolved
Related issues:

Reviewing origin/8697-ruby187-compatible:

I see this changes the gemspec dependencies for google-api-client:

```
- s.add_dependency('google-api-client', '~> 0.6.3', '>= 0.6.3')
+ s.add_dependency('google-api-client', '>= 0.7', '< 0.9')
```

Does that mean that we no longer need that geriatric google-api-client version for our Ruby sdk?

#6 - 04/19/2016 08:57 PM - Tom Clegg

Yes... we're graduating from a 3-year-old version (0.6.4) to a 1-year-old version (0.8.6).

AFAICT our dependence on 0.6.3 was an accident: According to commit logs, I pinned to 0.6.x to make bundle stop complaining that ">= 0.6.3" was too open-ended (which is kind of silly, given semver doesn't guarantee anything in 0.x).

Now we need <0.9 to avoid a Ruby >= 1.9 dependency. (IIRC one of google-api-client 0.9's dependencies, not google-api-client 0.9 itself, abandoned Ruby 1.8.)

Current version is 0.9.4.

Aha. LGTM then, thanks!
