

Arvados - Bug #9354

[workbench] make quota errors available to the user

06/06/2016 06:13 PM - Nico César

Status: Closed	Start date: 06/06/2016
Priority: Normal	Due date:
Assigned To:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
Description It's common to get a quota limit from the platform like the following: <code>BaseHTTPError: [OperationNotAllowed] Operation results in exceeding quota limits of Core. Maximum allowed: 100, Current in use: 99, Additional requested: 4.</code> It will be helpful if a queued job could have this information next to it in workbench
