

Arvados - Bug #9970

[Crunch2][API] ContainerRequest#Create passing with illegal requesting_container_uuid value(s).

09/07/2016 06:14 PM - Radhika Chippada

Status:	Resolved	Start date:	09/14/2016
Priority:	Normal	Due date:	
Assigned To:	Radhika Chippada	% Done:	100%
Category:	API	Estimated time:	0.00 hour
Target version:	2016-09-14 sprint		
Description			
During a container_request.create operation (1) either reset any requesting_container_uuid present in fill_field_defaults or (2) validate it in set_requesting_container_uuid.			
API should always populate the requesting_container_uuid with either the requesting container's UUID (if the update/create request is not authorized by a per-container API token) or nil.

Do you think wouldn't be better than evaluating self.requesting_container_uuid twice, to do something like this?

```
if self.requesting_container_uuid
  not_new_record?
end
```

Apart from that detail, LGTM.
